**Re: Minor Revision Applications
Federal Operating Permit Nos. O3369 & O1641
Enterprise Products Operating, LLC
East Storage Splitter III, RN102984911, and
Mont Belvieu Complex, RN102323268
Chambers County**

Dear Sir or Madam:

Enterprise Products Operating, LLC (Enterprise) operates the East Storage Splitter III and Mont Belvieu Complex located in Chambers County, Texas. These facilities currently operate under Title V Site Operating Permit (SOP) Nos. O3369 and O1641, respectively.

The purpose of the enclosed minor revision applications is to incorporate recent amendments made to 40 CFR Part 63, Subpart ZZZZ, as they apply to stationary reciprocating engines located at the sites. The enclosed forms provide the documentation necessary to add these units to the SOPs.

Due to the number of Enterprise sites affected by this regulatory change, a single signed TCEQ Form OP-CRO1, Certification by Responsible Official, is provided to certify multiple revision applications being submitted to the TCEQ today. An attachment to Form OP-CRO1 is provided to specify which permits are being certified with each signature.

Thank you in advance for your consideration of this application. If you have any questions concerning these applications, please contact me at (713) 381-5807.

Sincerely,

Ed Bergmann
Senior Environmental Engineer – Air Permitting

Section 1

Introduction

Enterprise Products Operating, LLC (Enterprise) currently operates the East Storage/Splitter III Facility and Product Handling Terminal facility in Chambers County. Operation of the East Storage/Splitter III Facility and Product Handling Terminal is authorized by Federal Operating Permit (FOP) No. O3369, which was first issued on March 7, 2011 and has been revised once since that date on January 10, 2013.

The purpose of this revision is to update the regulatory applicability of the site's reciprocating internal combustion engines to reflect recent amendments to 40 CFR Part 63, Subpart ZZZZ. The modifications which are relevant to Title V permitting requirements are described in the enclosed Form OP-2, Application for Permit Revision/Renewal, included in Section 2 of this document and explained in greater detail in Section 3. The referenced changes qualify for a minor FOP amendment pursuant to 30 Texas Administrative Code (TAC) § 122.215. This document was prepared in accordance with TCEQ's Site Operating Permit (SOP) Revision Application Guidance dated March 2010 and the requirements listed in 30 TAC §122.216, Applications for Minor Permit Revisions.

It should be noted that the TCEQ has not yet revised the Form OP-UA2 or the requirement reference table to incorporate the amendments to Subpart ZZZZ which are being addressed in this revision application. This application includes the most recent version of Form OP-UA2 available, and additional attributes will be provided if determined to be necessary during the technical review.

It should also be noted that due to the large number of facilities for which Enterprise is submitting revisions to accommodate this change, a single Form OP-CRO1 is being submitted to certify multiple sites. The original Form OP-CRO1 is being submitted as part of this application, with copies being included for additional Enterprise sites, as described in Section 2.
